TABLE OF CONTENTS FOR
"MILITARY GEOLOGY"

Edited by Prof A. M. Ovchinnikov
 Engr-Maj V. V. Popov
 Docent Iv. F. Grigor'yev

This book, written by a group of authors under the guidance of the Chair of Engineering Geology and Hydrogeology of the Moscow Geological Prospecting Institute, is intended as a textbook in military geology. The authors included: Docent M. N. Lushchikhin, Candidate of Geologico-Mineralogical Sciences (Chapters I, II, VI, XII); Prof N. I. Nikolayev, Doctor of Geologico-Mineralogical Sciences (III, IV, V, XV, and XVI); M. V. Churinov, Candidate of Geologico-Mineralogical Sciences (the sections on the role of geology in permanent fortifications); Prof B. A. Pyshkin, Doctor of Technical Sciences (VII); Prof G. V. Bogomolov, Doctor of Geologico-Mineralogical Sciences (VIII); Prof A. M. Ovchinnikov, Doctor of Geologico-Mineralogical Sciences (IX, XI, and XIV); Engr-Maj F. D. Zaytsev and Engineer Ye. S. Yurkovoy (X); and Engr-Maj V. V. Popov (XII).

TABLE OF CONTENTS

	Page
Foreword	7
Part 1. General Problems of Military Geology	
I. Tasks of Military Geology	9
II. History of Development of Military Geology	12
1. Geology in Military Affairs before World War I	12
2. Military Geology in World War I	13
3. Military Geology in World War II	21
4. Bibliography	23

- 1 -

	<u>Page</u>
III. Mineral Resources in the Country's Defense	24
1. Types of Strategic Raw Materials and Their Utilization	24
2. Extent to Which Individual Nations Are Supplied with Mineral Resources	31
3. Importance of the Work of the Military Geologist in the Economics of Strategic Raw Materials	35
4. Bibliography	37
IV. Importance of Rocks in Military Engineering	38
1. Engineering-Geological Properties of Rocks	38
2. Mineral Construction Materials	42
Natural Mineral Construction Materials	42
Artificial Mineral Construction Materials	47
Secondary Makeshift Mineral Construction Materials	48
3. Bibliography	49
Part 2. Military Geological Work in Various Branches of Military Engineering	
V. Geology and Fortification	50
1. Basic Information on Fortifications	50
Forms and Purposes of Fortified Constructions	52
General Concepts of Defense Organizations	53
Examples of Fortified Boundaries	57
Military Geological Servicing of Permanent Fortifications	64
Role of Geology in Field Fortifications	67
Fine Excavation Work in Fortifications and the Related Geological Problems	69
Trench Fortification Installations and Importance of Geological Factors in Their Construction	85
2. Role of Geology in Erecting Underground Constructions	89
3. Bibliography	99
VI. Geology in Underground Mine Warfare	99
1. Basic Information on Underground Mine Warfare	99
2. Underground Mine Warfare in Ancient and Recent Wars	100
3. Underground Mine Constructions and Land Mines	108
4. Basic Tactical-Technical Demands Made of Geology and Hydrogeology	114
Role of Surface and Subsurface Waters	114
Properties of Rocks Which Influence Success of Mining Work	116
Importance of Conditions of Underlying Rocks	117
Stability of Rocks in Roof and Walls of Subsurface Excavations	118
Rocks as a Protective Layer	118

	<u>Page</u>
Dependence of Size of Bomb and Action of Explosive Upon Properties and Conditions of Underlying Rock	119
Importance of Sound-Transmitting Properties of Rocks	120
Importance of Gas Permeability of Rocks	122
Role of Color of Rocks in Camouflaging Mine Fields	124
5. Military Geology as Applied to Mine Laying and Detection	125
6. Bibliography	129
VII. Geology and Military Hydroengineering	130
1. Tasks of Military Hydroengineering	130
Water Barriers	130
Drainage in Its Military Application	133
Water Routes and Port Constructions for Military Purposes	134
2. Geological Basis of Water Obstacles	135
Types of Water Obstacles	135
Hydrotechnical Constructions - Water Obstacles	138
Geological Studies	142
3. Role of Geology in Drainage of Military Sites	150
Drainage Methods	150
Characteristics of Drainage of Military Sites	154
Geological Service	156
4. Role of Geology in Construction of Water Routes and Ports of Importance to Defense	158
Nature of Construction Work	158
Geological Servicing of Water Routes and Ports	159
5. Bibliography	161
VIII. Hydrogeology in Military Water Supply	161
1. Basic Information	161
2. Norms for Water Requirements	164
3. Quality of Water for Military Water Supply	166
4. Selection of a Water-Supply Source and Methods of Improving Water Quality	168
5. Construction of Water Partitions and Mechanisms for Lifting Water From Them	178
6. Work of the Military Geologist in the Organization of Field Water Supply	188
Organization of Water Supply for Troops in Defensive Operations	188
Organization of Water Supply for Troops in Offensive Operations	190
Organization of Water Supply for Troops on the March	191

Organization of Water Supply for Troops in Mountainous Regions	191
Organization of Water Supply for Troops in Permafrost Regions	192
7. Bibliography	192
IX. Geology in Military Transport	193
1. Basic Information on Military Transport	193
Military Communications	195
Military Trails	195
Auto-Transport Roads	200
Military Field Railroads	203
Bridges and Portages	205
2. Soil-Geological Studies in Transportation	208
Selection of Road Route	209
Study of Soil Bottoms as a Foundation for Roadbeds	210
Evaluation of Road Construction Materials	217
Determination of Best Sandy-Clayey Mixture ("Optimal Bottoms")	221
3. Determining Passability of Swamps and Conditions for Constructing Roads On Them	223
4. Setting Up a System of Water Drainage	229
5. Reasons for Deformation of Roads	230
6. Strengthening and Stabilization of Bottoms	232
7. Evaluating Passability Elements in a Theater of Military Operations	235
8. Bibliography	239
X. Geology and Airfields	239
1. General Information	239
2. Types of Airfields	240
3. Construction of Airfields and Requirements for the Site	241
4. Types of Ground Coverings on Airfields	245
5. Drainage of Airfields	247
6. Characteristics of Airfield Water Supply	251
7. Engineering Geological, Hydrogeological, and Soil-Bottom Studies Required for Construction of Airfields	253
8. Bibliography	259
XI. Geology and Camouflaging	259
1. Definition and Tasks of Military Camouflaging	259
2. Role of Geological Studies in Solving Problems of Military Camouflaging	260
3. Basic Principles and Methods of Camouflaging	261
4. Distinguishing Features and Their Importance in Selection of Type of Camouflaging	262
5. Camouflaging of Various Military Objects	264

XII. Military-Geological Reconnaissance and Surveying	283
XIII. Military-Geological Maps and Mapping Methods	288
1. General Information	288
2. Military Maps	289
3. Military-Geological Maps	291
Maps of Passability of Territories	295
Water-Supply Maps	300
Maps of Handy Mineral Construction and Camouflaging Materials	307
4. Bibliography	309
XIV. Military-Geological Interpretation of Aerial Photographs	310
1. Basic Information and Ideas on Aerial Photographs and Interpretation	310
2. Geomorphological and Geological Interpretation	313
3. Hydrological Interpretation	322
4. Hydrogeological Interpretation	330
5. Soil-Botanical Interpretation	333
6. Interpretation of Military Objectives	335
Fortifications	335
Railroads	337
Airfields	339
Interpretation of Camouflaging Measures	339
7. Interpretation Techniques	342
8. Bibliography	344
XV. Evaluation of and Search for Mineral Construction Materials.	345
1. Evaluation of Quality of Mineral Construction Materials	345
Field Study of Geological Characteristics	345
Laboratory Study of Rocks	347
